

WHAT DOES IVCC'S CPT PROGRAM MEAN TO ME AS A STUDENT?

- Acquire the skills needed by local manufacturers in as few as 5 months
- Build a solid foundation that will lead to a lifelong career in manufacturing
- Obtain a nationally recognized, portable credential that is accepted throughout the United States

WHAT DOES IVCC'S CPT PROGRAM MEAN TO ME AS AN EMPLOYER?

- Well trained, prepared job applicants with 21st century manufacturing skills
- Common practices amongst employees across the plant
- Training and recruiting cost savings
- High performance employees

ABOUT IVCC, MSSC AND CPT

IVCC's goal is to be the source for continued learning and self-improvement for students of all ages in a variety of career paths. We continually strive to offer relevant resources for students and employers.

The Certified Production Technician Program provides the skills necessary for a career

path in production manufacturing. With the endorsement of area employers, IVCC

provides the training to acquire core skills and prepare individuals to enter a viable career, with options to broaden their skill base as they see fit.

The Manufacturing Skills Standards Council (MSSC) provides the industry-led training, assessment and certification system that

focuses on these core skills. IVCC works with the MSSC to facilitate the program and prepare students to pass the MSSC

certification, which is nationally recognized.
